Profile

BCA graduate with strong Python and problem-solving fundamentals, plus hands-on experience building database-driven web and mobile applications end to end. Comfortable working with data: cleaning it, modelling it, and writing scripts to process it. Currently building up machine learning fundamentals and looking for an AI Research Intern role to contribute to experiments, data work, and paper reading while learning research practice from an experienced team.

Technical Skills

Languages	Python, Dart, Java, C, JavaScript, PHP, SQL
Frameworks	Django, Flutter, React
Data	MySQL, schema design; data cleaning and processing in Python
Tools	Git, GitHub, Linux shell
Foundations	Data structures and algorithms, probability and statistics, linear algebra

Education

Bachelor of Computer Applications (BCA) **CGPA: 3.17/4.00**
Tribhuvan University, Nepal

Relevant coursework: Statistics and Probability, Linear Algebra, Data Structures and Algorithms, Database Management Systems, Numerical Methods.

Higher Secondary Education (+2) **GPA: 2.60/4.00**
Daisy English Higher Secondary School, Nepal

Experience

Python Django Developer Intern *Mindrisers Technology*
3 Months

- Built Python/Django application components, turning written requirements into working features.
- Designed relational schemas and wrote queries for database-driven features, with validation and integrity checks on user data.
- Wrote Python scripts to process and verify application data.
- Used Git/GitHub on a shared codebase; debugged systematically against reproducible cases.

Independent Flutter Developer *Self-directed*
Ongoing

- Built cross-platform Flutter apps, including a billing system and a travel companion app, covering data modelling, API integration, and UI architecture.

Projects

E-Stationery Management System *PHP, MySQL, JavaScript*
Inventory and transaction system with admin and user roles, stock management, and normalised database operations. [GitHub](#)

Car Rental System *PHP, MySQL, JavaScript*
Vehicle rental platform with booking logic, availability handling, and eSewa payment integration. [GitHub](#)

Online Shoe Store *PHP, MySQL, JavaScript*
E-commerce site with product catalogue, user accounts, and order handling. [GitHub](#)

Core Strengths

- Analytical problem-solving
- Self-directed learner
- Clear technical writing
- Reliable and collaborative
